NVIDIA HGX H100
8-GPU Server

NVIDIA HGX 6RU SERVER

Data Center Liquid Cooling

Designed for the highest computational demands today, AMAX liquid cooling solutions bring flexibility, eco-friendly design, and maximum performance to the data centers of tomorrow.

NVIDIA HGX 8-GPU Server

Integrating an NVIDIA HGX™ baseboard with NVIDIA H100/H200/B100 Tensor Core GPUs, the server brings the full power of accelerated NVIDIA GPUs, liquid cooling technology, and high-speed PCIe Gens connectivity to bring breakthrough performance for next gen AI.

KEY APPLICATIONS

- Generative AI
- Large Language Models (LLMs)
- Machine Learning
- High Performance Computing

DISAGGREGATED APPROACH

Three-layer sled design for easy maintenance, the server supports NVIDIA® HGX™ H100/H200/B100 GPU accelerators. CPU options include Intel® Sapphire Rapids/Emerald Rapids/Granite Rapids-SP/Sierra Forest-SP and AMD® Genoa/Turin to fulfill various usage scenarios.

Rack-Integrated Liquid Cooling Solution

The 6RU server incorporates liquid cooling technology to provide high-performance computing capabilities that generative AI and HPC demand while minimizing energy consumption for a reduced environmental footprint and lower carbon emissions.

AMAX engineers solutions to meet the rigorous demands of AI and HPC workloads. With a focus on advanced cooling technologies, AMAX delivers servers optimized for peak performance and designed to operate efficiently, further reducing operational costs and sustainability objectives.
